

COMMERCIAL PROPOSAL

Clinic software for doctors, patients, lab and pharmacy

A family-number clinic OS: appointments, documents, live desk operations, lab and pharmacy workflows, and WhatsApp care from home.

Item	Detail
Product	BtBIZ Doctor (MediGraph)
Standard package	2-Doctor Clinic Pack
Includes	WhatsApp bot, lab module, pharmacy module, email, SMS, server
Prepared for	[Client name]
Prepared by	[Your company name]
Date	14 September 2026
Quote valid until	14 October 2026
Taxes	GST 18% extra on all fees

How to read this document

There are two ways to buy the same product: a monthly or yearly subscription, or a one-time license. Both are built around two doctors. If you add a third doctor later, you add a seat — you do not buy a new product.

1. What this software does

BtBIZ Doctor is one system for the clinic and the patient's family. It is not only an appointment calendar. Doctors, assistants, patients, the lab and the pharmacy work in the same record.

For the patient

One mobile number becomes the family health account. The patient can log in, book a doctor, request lab tests, order medicines, upload documents and see health trends. They can do the same on WhatsApp by sending hi.

For the doctor

Today's and upcoming appointments, live booking alerts, availability (available / busy / unavailable), separate daily limits for online and walk-in patients, patient search inside the clinic, and prescription OCR.

For the assistant

Walk-in registration, check-in, vitals, document verification before files go out, and messages to that day's patients when the doctor's status changes.

For lab and pharmacy

Their own logins and queues. Patients can choose lab visit or home collection, and medicine pickup or home delivery. Status updates go back to the patient.

WhatsApp (included in this quote)

A healthcare assistant on WhatsApp with seven services: book appointment; profile and visit history; family members; lab request; medicine order; upload prescription; and view receipts and reports.

This quote includes email, SMS, WhatsApp and a production server. Those are not treated as optional extras in the standard package.

2. Who this package is for

This is priced as a working clinic, not as a single-doctor trial app. The standard package is:

Included in the 2-Doctor Clinic Pack	Quantity
Doctors	2 seats
Assistants	2 seats
Lab business	1
Pharmacy business	1
Clinic location	1
Typical daily load assumed	30–50 patients across both doctors

If you have more doctors later, you add seats. You do not buy a new product.

3. What is included in every paid plan

Area	Included
Doctor workspace	Appointments, live alerts, availability, online vs walk-in limits, patient search, OCR
Assistant desk	Walk-in, check-in, vitals, document verify, doctor-status messaging
Patient portal	Family profiles, booking, lab, medicines, documents, health graphs
Lab module	Incoming tests, home collection, reports, payment status
Pharmacy module	Incoming orders, pickup or delivery, billing, receipts
WhatsApp bot	Full 7-service patient flow, OTP, doctor list, menu
Email	Transactional mail: reports, receipts, notices
SMS	OTP, booking confirmations and reminders, within the pack below
Server	Hosting, SSL, daily backup and monitoring on subscription; or monthly hosting on one-time
Support	Onboarding, training and support as per the plan

Not included unless added: extra clinic branches; extra lab or pharmacy businesses; an online payment gateway (Razorpay); custom hospital branding beyond clinic name and logo; on-site training beyond the agreed sessions; and marketing WhatsApp broadcasts.

4. Two ways to buy

You can subscribe monthly or yearly, or buy the software once. Both include the same product: two doctors, lab, pharmacy and WhatsApp.

Choose subscription if you want a lower starting cost and we run the server. Choose one-time if you want to own the license and pay a yearly maintenance fee.

5. Option A — Subscription (SaaS)

We host the software. You pay a one-time setup fee, then a monthly or yearly fee.

5.1 Standard package: 2-Doctor Clinic Pack

This is the package we recommend.

Fee	Amount
One-time setup and go-live	Rs. 49,000
Monthly	Rs. 9,999
Yearly (2 months free)	Rs. 99,990

Setup includes: clinic name and logo; 2 doctor accounts; 2 assistant accounts; 1 lab; 1 pharmacy; WhatsApp number and message templates; SMS DLT guidance; email setup; 2 online training sessions; and the production server.

Every month this pack includes

Item	Allowance
Doctor seats	2
Assistant seats	2
Lab	1 business
Pharmacy	1 business
SMS	5,000 messages
WhatsApp conversations	3,000
Transactional email	Fair clinic use
Document storage	25 GB
Support	Phone / WhatsApp / email, next business day

If you stay within these limits, there is no extra bill.

5.2 Same product, priced per doctor

Use this if the clinic will grow doctor by doctor.

Fee	Amount
One-time setup (same go-live work)	Rs. 49,000
Per doctor, per month	Rs. 4,999
Minimum doctors	2 (so month 1 is at least Rs. 9,998)
Yearly per doctor	Rs. 49,990

Lab, pharmacy, WhatsApp, the SMS pack (5,000), the WhatsApp pack (3,000), email and server stay included as long as you are on two or more doctors.

Doctors	Monthly software fee
2 doctors	Rs. 9,998
3 doctors	Rs. 14,997
4 doctors	Rs. 19,996

The 2-Doctor Pack (Rs. 9,999) and two times the per-doctor rate (Rs. 9,998) are effectively the same. The pack is simply easier to put on an invoice.

5.3 Add-ons on subscription

Add-on	Price
Extra doctor on the 2-Doctor Pack	Rs. 1,499 / month
Extra doctor if you chose per-doctor billing	Rs. 4,999 / month

Add-on	Price
Extra assistant (beyond 2)	Rs. 499 / month
Extra lab or extra pharmacy	Rs. 1,999 / month each
Extra clinic branch	Rs. 4,999 / month
Extra 1,000 SMS	Rs. 250
Extra 1,000 WhatsApp conversations	Rs. 499
Extra 10 GB storage	Rs. 200 / month
Razorpay online payments	Rs. 15,000 one-time + gateway fees (about 2%)

6. Option B — One-time license

You buy the software for one clinic. You do not pay a software rent every month. You do pay yearly maintenance, and you pay for hosting and messages.

6.1 Standard package: 2-Doctor Clinic Pack

Line	Amount	What it covers
Software license (perpetual, 1 clinic)	Rs. 3,25,000	2 doctor seats, assistants, patient portal, lab, pharmacy, OCR, live alerts
WhatsApp bot (7 services)	Rs. 75,000	Number setup, templates, bot flows connected to the clinic
Go-live, training, DLT / SMS / email	Rs. 35,000	2 online training sessions, production deploy, DLT guidance
Total to start	Rs. 4,35,000	2-doctor clinic with WhatsApp, lab and pharmacy

This is for two doctors. Extra doctor seats are below.

6.2 Extra seats and units

Item	Amount
First 2 doctors	Included in Rs. 4,35,000
Each extra doctor (one-time)	Rs. 25,000
Each extra assistant beyond 2	Rs. 8,000
Extra lab or extra pharmacy business	Rs. 40,000 one-time
Extra clinic branch	Rs. 1,25,000 one-time

3-doctor example: Rs. 4,35,000 + Rs. 25,000 = Rs. 4,60,000 to start.

6.3 Hosting and messages after purchase

The license is the software. Running it still needs a server and SMS / WhatsApp.

Hosting — choose one

Option	Amount	Notes
We host for you	Rs. 3,499 / month	Server, SSL, backup, updates to the live server
You provide a VPS	Rs. 18,000 one-time deploy	Your cloud bill is separate (typically Rs. 2,500–4,500 / month)

Communication wallet (billed on actual use)

Item	Typical monthly	Overage / prepaid rate
SMS	Rs. 600–900	Rs. 0.25 per SMS after any prepaid pack
WhatsApp	Rs. 2,500–4,000	Rs. 0.50 per conversation after prepaid pack
Email	Rs. 50–200	Included in hosting if we host

You can prepay a wallet (for example Rs. 10,000) and we deduct from it.

6.4 Yearly AMC (required)

Item	Amount
Software maintenance (updates, bug fixes, support 10:00–18:00 IST, weekdays)	Rs. 65,000 / year
Optional prepaid SMS + WhatsApp starter wallet	Rs. 36,000 / year (adjusts against actual use)

AMC starts after 90 days of go-live. The first three months of support are included in the license. Without AMC we cannot keep WhatsApp templates, SMS DLT, security patches or server support.

7. Side-by-side: 2-Doctor Pack

WhatsApp, lab and pharmacy included. Figures exclude GST. Subscription yearly assumes you pay annually.

	Subscription	One-time license
To start	Rs. 49,000	Rs. 4,35,000
Software fee, year 1	Rs. 99,990 (or Rs. 9,999 × 12 = Rs. 1,19,988)	Included in the license
Hosting, year 1	Included	Rs. 3,499 × 12 = Rs. 41,988 if we host
WhatsApp + SMS, year 1	Included up to the packs	Usage, typically Rs. 36,000–48,000
AMC, year 1	Not applicable	Rs. 65,000 (from month 4; often invoiced in year 1)
Typical money out in year 1	About Rs. 1.5–1.7 lakh	About Rs. 5.8–6.0 lakh
Year 2 and year 3	Rs. 99,990 per year + overage if any	AMC Rs. 65,000 + hosting ~Rs. 42,000 + messages ~Rs. 40,000 ≈ Rs. 1.5 lakh / year
Three-year total (typical)	About Rs. 3.5–3.8 lakh	About Rs. 8.8–9.0 lakh

In short

Subscription is cheaper over three years and easier to start. One-time costs more up front. You hold a perpetual license for that clinic.

8. What we assume in these numbers

- One clinic, one city, Indian mobile numbers.
- About 30–50 patients a day across both doctors.
- SMS: OTP, booking confirm and reminder. Not promotional bulk SMS.
- WhatsApp: patient-initiated chat plus utility messages (OTP, booking, status). Not ads.
- Email: reports and receipts, not newsletters.
- Payments inside lab and pharmacy today are mark as paid (cash or UPI at the counter). Online collect via Razorpay is an add-on.
- Data stays on an Indian or Mumbai-region server unless you ask otherwise.
- Quote is for the product as a clinic OS. Hospital IPD, insurance TPA and government scheme billing are not in this price.

If the clinic is much busier (for example 80+ patients a day), SMS and WhatsApp packs will run out and overage applies. We will set a monthly cap with you so there are no surprises.

9. Go-live you will see

1. Accounts for 2 doctors, assistants, lab and pharmacy.
2. Patient web portal.
3. Production server with HTTPS and backup.
4. Email sending.
5. SMS (DLT templates; the TRAI DLT entity fee is paid to the operator, about Rs. 5,000–6,000, usually by the clinic).
6. WhatsApp Business / BSP number and the 7-service bot.
7. Two training sessions.
8. 14-day supervised pilot.

Typical timeline after advance: 3–4 weeks.

10. Payment terms

Subscription

50% of setup with the work order, 50% of setup on go-live. The first month (or the first year if annual) is due on go-live. Then in advance each period.

One-time license

40% with the work order, 40% when UAT (test clinic) is ready, 20% on production go-live. Hosting is billed monthly. AMC is billed yearly in advance.

Work starts after the first payment. This quote is valid for 30 days from the date on the cover.

11. Our recommendation

For most clinics: Option A, 2-Doctor Clinic Pack

Setup Rs. 49,000, then Rs. 9,999 per month, or Rs. 99,990 per year. Extra doctor later: Rs. 1,499 per month.

Choose Option B (Rs. 4,35,000 one-time) only if the clinic clearly wants to own the license and is comfortable with yearly AMC plus hosting.

12. How to proceed

Tick one option, fill the clinic details, and return a signed copy. A work order and invoice will follow.

Subscribe — 2-Doctor Pack (monthly) Setup Rs. 49,000 + Rs. 9,999 / month
Subscribe — 2-Doctor Pack (yearly) Setup Rs. 49,000 + Rs. 99,990 / year
Subscribe — per doctor Setup Rs. 49,000 + Rs. 4,999 per doctor / month (minimum 2)
Buy once — 2-Doctor Pack Rs. 4,35,000 + Rs. 3,499 / month hosting + Rs. 65,000 / year AMC
